Summary

I am a Software Engineer with 4.1+ years of experience, specializing in backend development with PHP, Laravel and Node.js. Skilled in scalable software design, Agile methodologies, and CI/CD processes, I focus on delivering high-quality, maintainable backend solutions while collaborating across teams to meet modern industry standards. My expertise includes optimizing performance and building robust, efficient systems that support business objectives.

Skills

- PHP, Laravel, Node JS, Express JS, JavaScript, EJS, ES6, AWS EC2 Service, AWS Services, REST API, Swagger
- AWS Lambda Service, AWS S3 Bucket, AWS Secrets Manager, Redis, MongoDB, MySQL, GIT, CI/CD Pipeline,
- Payment Gateway Integration, SVN, Postman, JQuery, HTML, CSS, Ajax.

Experience

Invoked Digital Pvt Ltd | Sr. Backend Developer

Remote, INDIA | 11-Dec-2023 – Present

- Successfully handled multiple projects like Employee Management, Tours & Travels, and Abbey, enhancing database and application structures while creating reusable code with a collaborative team under expert guidance.
- Worked with technologies like PHP, Laravel, Node.js, Express.js, JavaScript, MySQL, MongoDB, and AWS services (Lambda, EC2, S3, API Gateway, DynamoDB), using microservices architecture and reusable libraries.
- Deployed and managed applications in production, ensuring high performance, security, and scalability while efficiently handling end-to-end project development and hosting.

Chetu India Pvt Ltd | Software Developer

Noida, INDIA | 28-Feb-2022 – 21-Sep-2023

- Gained experience in developing industrial solutions and system enhancements using cutting-edge technologies in a dynamic professional environment.
- Worked with a skilled team under expert mentorship to refine coding standards, adopt best practices, and implement efficient solutions. Collaborated with clients to gather requirements, craft technical solutions, and deliver successful projects.
- Worked extensively with diverse technologies, including Node.js, Express.js, JavaScript, PHP, MySQL, MongoDB, Laravel, and AWS services (Lambda, EC2, S3 Bucket, API Gateway, DynamoDB). Demonstrated expertise in client-focused solutions.

Appinventive Technologies Pvt Ltd | Associate Software Developer

Noida, INDIA | 22-Jan-2021 – 06-July-2021

- Developed Gurushala, an online education portal, providing e-learning solutions to users with seamless access to educational content.
- Built eCommerce websites and APIs, focusing on backend development and enhancing skills in scalable system design and performance optimization.
- Collaborated with teams, gaining project management experience and proficiency in version control tools like Git, SVN, Trello, and Jira.

QualDigiln Technologies Pvt Ltd | Web Developer

Kanpur, INDIA | 10-Dec-2019 – 15-Jan-2021

- Developed a web application and APIs for a School Management System, streamlining operations with an intuitive interface.
- Utilized Node.js, MySQL, payment gateways, AWS S3, DocuSign, and third-party APIs, while enhancing project management skills using Trello and version control with Git, SVN.

PROJECTS

- **Online Doctor Appointment**
In this project, doctors can register on the platform and set their available time slots for appointments. Patients can create profiles and book appointments with doctors based on their preferences and the available slots. An admin panel enables the administrator to manage doctors, patients, registrations, appointments, and key functions to ensure smooth platform operations. I was responsible for the project management, ensuring timely milestones and deployment of the system for production. This system provides a user-friendly way for patients to book appointments and allows doctors to manage their schedules efficiently, ensuring a seamless interaction between all users.
- **BlackGirlsCode**
This is an e-learning web application developed for American NGOs, providing both online and offline education through a seamless platform. The application uses Node.js for building robust APIs, Express.js for web development, and React.js for a dynamic and responsive front-end. It integrates various third-party APIs and tools such as Git for version control, AWS S3 for file storage, and AWS EC2 for cloud hosting, ensuring scalability, security, and performance.
- **Not Just Travel**
Not Just Travel is a tour web and mobile application designed for vocational trips, offering online holiday packages through an intuitive platform. The application leverages Node.js for building scalable APIs, PHP and the Laravel Framework for a secure and efficient web application, and JavaScript for dynamic front-end functionality. This system ensures seamless booking experiences and optimized user interactions, making travel planning easier for customers.

Education

Azad Institute of Engineering & Technology | Bachelor of Technology

Lucknow | 2016-2019

- Percentage: 67.33 %
- Computer Science and Engineering

Additional Course

Relevant Coursework: Python, Django

Achievements

- Awarded by **Chetu India Pvt** twice for better performance regarding development.
- Attend in seminar & Workshop AI & Machine Learning organized by Radiance - IIT Bombay in 2017.
- Strong problem-solving skills and ability to troubleshoot complex issues efficiently.
- Excellent communication and interpersonal skills, with a proven ability to collaborate effectively in a team environment
- Passionate about continuous learning and professional development, actively seeking opportunities to expand knowledge and skills in emerging technologies.
